Reflectance Confocal Microscopy Can Help the Dermatopathologist in the Diagnosis of Challenging Skin Lesions.

Kelsey A, Grant-Kels JM, Rabinovitz H, Oliviero M, Scope A.

ABSTRACT

Despite the successful assignment of Current Procedural Terminology codes, there are barriers to incorporating in vivo reflectance confocal microscopy (RCM) into daily practice. Importantly, the dermatopathologist can play a key role in interpreting RCM images and can use these images to correlate with histopathology. Herein, we describe, using a case series, how RCM can be incorporated into the dermatopathologist's practice. We also summarize the criteria for RCM diagnosis of common neoplasms.
